# EAT MY DUST

How, it's gone now?

UN-TREATED TREATED

## GENERAL PURPOSE OUTDOOR DUST SUPPRESSANT

## DUST AT WORK. .

Dust at work can be a real nuisance. Not to mention a major liability. Dust destroys equipment, impairs our visibility and causes respiratory irritation and even disease.

Stopping dust at work can be as simple as spraying dusty areas with simple water to amending the soil with dust free additives.

While no one program could be prescribed for all needs DustLockerTM is a vital addition to any dust control program.

DustLockerTM last months longer then water alone.

DustLockerTM is safer then water in runoff areas where water may cause soil stability issues.

DustLockerTM is perfect for temporary events like swap meets, car shows, filming projects and sporting events.

DustLockerTM is a safe non-toxic natural dust locker with a PH balance of water.

DustLockerTM is safe for use around streams and in sensitive environmental conditions.

DustLockerTM is the only solution for construction and filming projects that require dust abatement procedures.

Try DustLockerTM today order convenient sizes for all your needs on line anytime.

## DUST ON THE ROAD

Dust on the road is a serious issue. Dust impairs our visibility and makes driving dangerous. Road dust destroys our equipment and is especially harsh on our cars and vehicles.

DustLockerTM provides a safe healthy alternative to costly expensive wasteful water trucks and suspect oil based products.

DustLockerTM for the road is applied using a standard sprayer or water truck. Providing months the lasting power of water alone. Without any need to purchase costly specialized equipment.

DustLockerTM offers affordable reoccurring specials on regular contract periods. Need your road treated on a regular basis? Then save money with custom delivery and special pricing.

## DUST AT HOME. .

Dust around the house can cause respiratory illness and destroys our furniture and home office equipment. It's simple to treat your house. Using DustLockerTM is the smartest way to stay dust free all season.

The front yard shown above was a constant source of dust inside the house.

Using a common sprayer\* to apply DustLockerTM is a snap. It takes only a few moments to protect your house from dust. Safe for use around animals, in stalls and all those dusty areas around the house.
