

# EAT MY DUST

## How, where is it now?

UN-TREATED

TREATED

**ABOUT DUST CONTROL:**

Attractive repeat profits from a never ending problem, dust. We all know of dust or have encountered someone who does. Now you can reap the profit from the most annoying and dangerous problem many people in rural/industrial areas face. That is dust. Dust depending on the area's environment can carry many dangerous carcinogens. With the health issues has come many local state and federal laws and regulations regarding dust control in a variety of industry. This trend will continue in the future. PM 2.5 and 10 regulations on new construction prohibit fugitive dust and can be expensive to deal with in hotter climates where the sun will dry out water control techniques in minutes,

**RETAIL SUPPORT PROGRAM:**

We support your every effort to maximize profits in the growing dust control business. With hands on field representatives, more co-op advertising dollars , free sales materials like posters and supporting point of sale displays.

**TRAINING / DEMONSTRATION PROGRAMS:**

Special events or in store workshops are a great way to increase sales and train employees on the technical aspects most important to your core consumer groups. We are always open to your special needs and ideas.
